

GEC 2025 – 1st Announcement

Dear Colleagues,

We are pleased to announce that the 78th Gaseous Electronics Conference (GEC) will be held on **October 13-17, 2025 in Seoul, Republic of Korea.**

The GEC is a leader in providing a venue for the exchange of ideas and reporting research in low-temperature plasma science and technology. The areas of emphasis are the science of plasma sources, diagnostics, modeling, plasma chemistry, basic phenomena, and atomic and molecular collision processes. GEC is often at the forefront of reporting on emergent areas of plasma-based technologies, including microelectronics, propulsion, biotechnology, plasma medicine, multiphase plasmas, environmental applications, and atmospheric-pressure plasma systems.

The 2025 GEC will feature invited talks from leaders in plasma science and technology, as well as atomic and molecular collisions. The complete list of invited speakers is available at www.apsgec.org/gec2025/invited_speakers.php. Among other topics, these invited speakers will discuss:

- Plasma applications in semiconductor manufacturing
- Electrical propulsion
- Ionization and dissociation of molecules
- Plasma theory and modeling
- Plasmas in liquids
- Atomic layer deposition and etching

The 2025 GEC will begin with 4 workshops/tutorials on Monday. The topics for these workshops/tutorials will be announced soon. The lists of topics and speakers will be published on www.apsgec.org/gec2025/workshops.php.
